ARROW PVC UNDERGROUND PIPE & SPACER

1/2" & 3/4"
pvc pipe spacer

PVC PIPE SPACER 110mm
PVC PIPE SPACER 50mm
PVC PIPE SPACER 75mm

Functional Characteristics
Pipe Spacer Multi Series can be installed both vertically and horizontally and do not require any tools for assembly. It is a very versatile support, because you can add as many modules as needed, in multiples of 4 or 2 depending on the Separator model. The pipe spacer (supports and separator for tubes) has the task of aligning and distancing the underground pipes in a trench in order to leave enough space for the entry of concrete and gets a rigid structure.

Construction safety net for construction in case of dropping of building materials or work staff, using construction net surround whole building, protecting high space work staff and walking man, also keep clean working place.

Material: HDPE
Characters: high strength / easy fixing / environment protection
POWER CLIMBER PC-500 & PC-800

POWER CLIMBER PC-500 series gondola is an ideal equipment for building facade construction, decoration, cleaning and maintenance. It is also widely used in elevator installing, ship building and repairing. POWER CLIMBER PC-500 series versatile knock-down platforms provides workers with safer, easier and more efficient platform access. Compared with other equipments, our suspended platforms has the advantages of superior quality, reliability, safety, easy installation, high efficiency and space saving.

POWER CLIMBER PC-500 HOIST

ACCESSORIES:

- Hoist: The most important part of the gondola. Its function is to lift the aluminum platform. Adopting international advanced cable-guiding system and with its main parts produced by CNC, assures one that PL-500 series hoist is of durable design, easy maintenance and of superior quality.
- Safety lock: The safety lock is the important safety device of the gondola. The safety lock will automatically lock the wire rope in the event the suspension rope breaks or when the platform tilts.
- Electrical control system: The electrical system controls the two Power Lift hoist. The control is designed according to standard. Safety devices such as earth leakage protection device, relay protection of power system, limit switch are installed to make operation easier, safer and reliable.
- Suspension mechanism: The suspension mechanism is installed on top of the building. Its knock down parts make it easy for transport and installation. The height and the overhang of the job can be actuated to adapt different kinds of building facades and roof structures. The suspension mechanism includes the counter weight.
- Aluminum suspended platform: The suspended platform is made of aluminum knock down platform. This makes the aluminum platform light, durable, rust-free, and easy to install and dismantle. The knock down platforms are compact and easy to store and transport.

Plastic Spacer Feature Specification
Product name: Plastic Spacer
Model No.: 12mm
Article No.: Wheel style spacer, platform style spacer, safety caps for steel, continuous plastic chair,
PVC cone pipe, plastic cone
Keyword: Plastic spacer, Plastic block
Category: Building plastic

Product Description: Plastic spacer block for protective layer of reinforcing steel bars is designed according to the requirement of national steel concrete contral design norm. It is widely applied in the civil and industrial construction of buildings, roads, bridges, tunnels, airports, subway and so on.

Product Character: Having the advantages of high bearing capacity, self-locking, crash-proof, good coherence, and easy operation. It is free from the potential quality problems of instable thickness of the protective layer resulting from the use of traditional materials of coprolites and sands.

Executive Standards: GBT10-89 Q/SJLX01-2000
Compression Strength: >4.2Mpa
Tensile Strength: >4 Mpa
Circular Concrete Column Forms
Super Durable, Super Light, Variable Diameter and Lengths. We manufacture circular forms starting at 12” diameter up to 60” diameter in 12” increments. All columns are 24” high and can be belted together to achieve any required height. Round column 18” by 4” sections for round concrete pillar forming.
